Work Experience

Cognizant, Kolkata   Sept 2023 - Present
Junior Software Engineer

- Worked across domains, including consumer goods, insurance, media, and print as a frontend developer.
- Collaborated with business units to gather requirements, translate user needs into platform features, and resolve bugs efficiently.
- Delivered solutions within deadlines while ensuring clean, maintainable, and high-quality code.
- Contributed to building user-centric platforms by aligning technical implementation with business objectives.

Cognizant, Kolkata   Feb 2023 - Jun 2023
Intern

- Gained hands-on exposure to full-stack software development, working across both frontend and backend systems.
- Developed user interfaces with HTML, CSS, and JavaScript to enhance usability and design.
- Built and maintained backend services using Java Spring Boot, ensuring scalability and performance.
- Worked with relational databases using SQL for data management and integration.

Education

Narula Institute of Technology   July 2021 - July 2023
Master of Computer Applications

Project Work

- **Gamify:**
  - Developed a highly engaging website with next-level animation and immersive user experience
  - Leveraged GSAP for advanced animations.
  - Implemented dynamic functionality using React Hooks for state and lifecycle management.
  - Applied Tailwind CSS for responsive, modern, and scalable styling.
  - Optimized performance and transitions to enhance user interaction. Live Project
